

TELUS Digital

Name & Logo Guidelines

>> **Please note** - The new TELUS Digital logo was launched on September 18, 2025. As part of our rolling rebrand, instances of the previous TELUS Digital logo (with the flying T) should now be replaced with the new logo mark.

TELUS Digital

Internal abbreviation

TELUS Digital should be used without abbreviation to reinforce the brand as much as possible.

Regional / Geo naming

Regional naming will follow this format:

TELUS Digital India, TELUS Digital Ireland, TELUS Digital Philippines. These can be shortened further using the two-letter ISO country standards (see brand guidelines). E.g. TELUS Digital PH.

>> Items to note

- Do not shorten to TD which is an owned trademark of TD Bank
- The rebrand will not include a change to our legal name.

Writing guidelines

DO

- ☒ Always spell out TELUS Digital in full and ensure TELUS is in all caps
- ☒ Ensure you follow proper logo usage guidelines shared in this document
- ☒ Always use the French version of our name for internal and external Quebec audiences

DO NOT

- ☐ Abbreviate TELUS Digital to TD as this is a trademark of TD Bank
- ☐ Create your own logo email signatures. These are supplied by marketing/brand
- ☐ Create your own geo naming convention.

French name

The French version of our name - **TELUS Numérique** - is shown below. All English-based guidelines apply here as well.

Logo Application

Usage restrictions

- The TELUS Digital logo must appear by itself; it may not be combined with any other graphic or textual elements and may not be used as a design element of any other logo or trademark.
- The logo must always be scaled proportionately. Never squish it horizontally or vertically or distort it in any way. To scale the logo graphically, grab a corner (rather the side of the graphic) and drag to the desired size.

Clear space

The illustrations below describes the clear space that must always surround the TELUS Digital logo. For both applications, the minimum space to sides (left, right, top, bottom) must be at least equal to the cap height of the letter “T”.

Trademarks

Trademarks are some of our most valuable assets and it's important that we do everything possible to protect them. Exclusive rights to a trademark can be lost through improper use, or lack of use, so it's important to be precise when using trademarks in all cases.

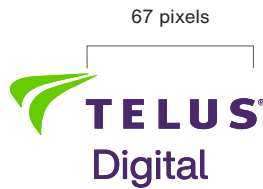

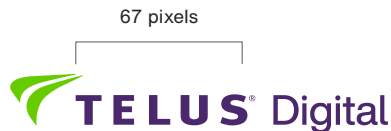

- The logo and registered trademark may not be altered in any way. The symbol ® must appear at the end of the word TELUS in the TELUS Digital logo.
- The ® is intended to appear as small as possible and still be legible, even on large applications. The minimum size for the ® with the logo is 4 points.
- When appearing in running text, the ® is set at 33% of the font size to a minimum of 4 points and top-aligned with the font's cap height. Items are identified with a trademark the first time they appear in the text only. Subsequent occurrences are not marked.

Example: **TELUS® Digital**

- The registered trademark always appears in the same color as the logo text.

Minimum size - web application

To ensure legibility on-screen, do not reproduce the logo at sizes where the logotype is smaller than 67 pixels wide. All other elements of the logo should remain in proper proportion to this width. If our application requires branding less than 67 pixels, just type the name: TELUS Digital.

Minimum size - print application

To ensure legibility in print, do not reproduce the logo at sizes where the logotype is smaller than 15 mm. If your application requires branding less than 15 mm, just type the name: TELUS Digital

Color - web

The approved RGB color values for web application are:

TELUS Purple: RGB: 75, 40, 109 HEX: #4B286D

TELUS Green: RGB: 102, 204, 0 HEX: #66CC00

Color - print

The approved CMYK color values for print application are:

TELUS Purple: CMYK: 85% - 100% - 25% - 13% Pantone: 269

TELUS Green: CMYK: 50% - 0% - 100% - 20% Pantone: 376

Color options

The TELUS Digital logo may be full color, or one color when the application does not allow for more.

Full color Pantone/CMYK application

One color: black

Full color online/web RGB application

Background options

You may also reverse the logo out of black, TELUS purple, Forest, Orchid, Obsidian and Slate. See our color palette [here](#) to obtain the PMS, HEX and CMYK values for these colors.
